BAINTECH DC Distribution Panels

Great for

As you pull out of the driveway, ready to get away from it all in your 4WD, caravan or camper, the battle begins: which 12 V device will you plug into the dash outlet? Your GPS? The wife's smart phone? The iPod that will keep your child entertained for the ride? Maybe the power hungry fridge that ensures you'll be able to crack open a cold one when you reach your destination? Avoid the conflict. Get a Baintech DC Distribution Panel.

Smart, affordable and prewired for virtually foolproof DIY flush mount installation, Baintech Distribution Panels let you charge and power multiple 12v devices at the same time from your dash or from the reardrawer in your 4WD.
